COOPERATIVA PESCATORI
CAMOGLI

La Tonnarella di Camogli is a sustainable and local fishing method that has been used in Camogli since 1600 and is the only one of its kind in the Mediterranean.

The process lasts from April to September and is run by the local fisherman cooperative. The fishermen lower a net into the sea directly in front of an ancient fishing village under the Portofino mountain. The large net is made almost entirely of biodegradable coconut fiber and allows only certain fish to be caught, including Amberjack, Palamite, Allettereati, Sugarelli and Tombarelli. When the time comes, fishermen hoist the nets up with their arms and gather the fish within the enclosure of the tonnarella. The fish is "salted" and immediately divided and delivered fresh to local restaurants to be cooked and enjoyed. This is a splendid example of sustainable fishing right at our doorstep.
